WORK EXPERIENCE

Front-end developer IdeaBit

01/2024 - Present Jabalpur , India
Led the development of over 10 responsive, user-centric websites with a focus on scalability and maintainability. Collaborated with cross-functional teams, including product managers and designers, to define software requirements and ensure alignment with business objectives. Delivered high-performance web solutions using HTML5, CSS3, JavaScript, and modern frameworks, optimizing for speed and accessibility across all devices. Conducted peer code reviews to promote a culture of code quality and knowledge sharing within the team.

EDUCATION

Master in Computer Application Jain University, Bangalore

07/2022 - 07/2024 8.6 SGPA

Bachelor in Computer Application Rani Durgavati Vishwavidyalaya, Jabalpur

08/2018 - 08/2021 62%

TECHNICAL SKILLS

|---------------------------|-----------------------|
| HTML5 | CSS |
| JavaScript | React js |
| Bootstrap | Firebase |
| Secure coding | scalable architecture |
| unit testing | Agile methodologies |
| cross-functional teamwork | |

PROJECTS

ChatBotify - Generative AI-Powered Web Application

- Developed a web application that leverages generative AI to provide real-time answers to user queries. Using HTML, CSS, and JavaScript for the frontend, the app integrates an external API to process natural language and generate accurate responses. This project demonstrates my expertise in building interactive user interfaces, integrating generative AI models, and ensuring smooth API functionality for enhanced user engagement.

Whitepace SaaS

- This SaaS website template is built using HTML & CSS It seamlessly combines style and functionality to create an engaging user experience. Enhance your online presence with a design that not only looks great but also ensures ease of use and smooth navigation for your users.
- <https://deepaklalani.github.io/whitepace-saas/>

Rj International

- I created a website for Rj International, a freight forwarding company. The site showcases the company's services and operations, offering a professional online presence. I developed the website using HTML, CSS, and JavaScript, and implemented an SMTP contact form, enabling visitors to directly send messages to the client's email. This allows seamless communication between the company and potential client
- <https://deepaklalani.github.io/Rj-international/>

Recipe Finder App

- I developed a web-based **Recipe Finder App** that allows users to search for food recipes by leveraging an **API** and **AJAX** to fetch real-time data. When a user searches for a dish, the app displays several recipe options along with a **"Show More Info"** button for each. Upon clicking the button, two pop-up windows appear: one shows the ingredients with their measurements, while the other provides a description of the dish, including an embedded YouTube video poster for easy access to cooking tutorials. This project demonstrates my ability to work with APIs and dynamic user interfaces.scores in real time.
