WORK EXPERIENCE

Front-end developer (Intern)
IdeaWP

09/2024 - 10/2024   *Jabalpur , India*

Joined the organization as a Front-End Web Developer Intern, where I assisted in developing and maintaining responsive web interfaces using HTML, CSS, and JavaScript. Collaborated with senior developers to implement UI components, debug issues, and ensure cross-browser compatibility. Contributed to optimizing page performance and accessibility, while gaining practical experience with version control systems like Git and task management tools. Actively participated in team meetings and code reviews, laying a solid groundwork for a transition into a full-time development role.

Frontend React developer
IdeaWP

11/2024 - Present   *Jabalpur*

Led the development of over 11 responsive, user-centric websites with a focus on scalability and maintainability. Collaborated with cross-functional teams, including product managers and designers, to define software requirements and ensure alignment with business objectives. Delivered high-performance web solutions using HTML5, CSS3, JavaScript, and modern frameworks, optimizing for speed and accessibility across all devices. Conducted peer code reviews to promote a culture of code quality and knowledge sharing within the team.

EDUCATION

Master in Computer Application
Jain University, Bangalore

07/2022 - 07/2024   *8.6 SGPA*

Bachelor in Computer Application
Rani Durgavati Vishwavidyalaya, jabalpur

08/2018 - 08/2021   *62%*

TECHNICAL SKILLS

HTML5	CSS
javaScript	React js
Redux	Bootstrap
Tailwind	Firebase
Agile methodologies	Vite
Node js	

PROJECTS

Chat AI+ - Generative AI-Powered Web Application
- Developed a web application that leverages generative AI to provide real-time answers to user queries. Using HTML, CSS, and JavaScript for the frontend, the app integrates an external API to process natural language and generate accurate responses. This project demonstrates my expertise in building interactive user interfaces, integrating generative AI models, and ensuring smooth API functionality for enhanced user engagement.

GatherX -Video Call Application
- React, Firebase, WebRTC Developed an internal video calling application for company-wide communication. The platform features user authentication and email verification using Firebase, followed by peer-to-peer video calls enabled by WebRTC for secure and real-time communication. Built with a responsive UI in React, GatherX emphasizes seamless performance and user experience. Currently integrating additional features such as real-time chat to enhance collaboration and extend functionality.

keepSter
- **KeepSter** is a full-stack note-taking web application built with **React** and **Firebase** . It allows users to create, format, and manage notes through a responsive and intuitive interface. The application features secure user authentication, real-time database integration for storing and retrieving notes, and a rich-text editor to enhance the writing experience. By combining a dynamic front-end with a serverless backend, KeepSter delivers a seamless, efficient, and user-friendly platform for organizing personal notes.
